

# Project Tasks Overview

You will build a website for a popular music band. The fans of the band and other users will be able to perform the following actions on the site:

- See pictures from past events
- See popular lyrics of songs
- See a list of upcoming events
- Create an account
- Sign in and register for an event
- Sign in and see past registrations

## Capstone Steps

In order to successfully complete the project, you will take the following steps:

1. Create **Get Pictures** microservice in Flask
  - a. Create CRUD endpoints for picture as a resource.
  - b. Create health endpoint for the microservice.
2. Create **Get Songs** microservice in Flask
  - a. Set up MongoDB database.
  - b. Implement the service to retrieve song lyrics from the database.
  - c. Create health endpoint for the microservice.
3. Create the **Main Application** in Django
  - a. Create the concert model.
